Teaching Online:

# From **NOPEs** to **HOPEs**

**1st HELTA Online Swap Shop**

It's routine now: You switch on your PC, turn on your LED ring-light, choose your virtual background, call up your files, and zoom literally and figuratively into your class.

Hard to imagine that just a few months ago, online teaching for you seemed to be up there together with autonomous flying cars. But now that you've got the hang of it, you're not working out the technology anymore; you're working with it, you're making it work for you, and you're really working it!

So it's about time we had a swap shop where we share what works and what doesn't when teaching online. Tell us your tips and tricks; your fave online lessons; the things that worked spectacularly or failed miserably (*don't worry, your students probably didn't notice and we promise not to tell*).

But most of all, let's just get together and start the ball rolling again.

Hoping to see you all there!
